Bottle Water = Safety & Eco-friendly ?

Safety

- Minerals such as Calcium, Potassium, Zinc and Magnesium will be eliminated in distilled water
- Water will be polluted during delivery
- Bacteria grow at dispensing area, water bowl and other parts of the bottled water dispenser

Eco-friendly

- Bottled water has a huge environmental impact. Carbon emission is created by production and transport of bottled water
- Most of the plastic bottles cannot be recycled. As a result, they will become plastic wastes and go to HK landfills. HK landfills will be full by 2020

Carbon Multi-Filtration System

- Filter impurities by 2 different size of filters from 1 micron - 20 micron
- Remove lead, odour, chlorine, pesticides, chemicals and other related contaminants effectively
- Keep natural minerals in water

* 1 micron means one millionth of a metre
Hair is 75-100 micron, bacteria is 0.2-3 micron

Firewall™ UV Purification

- Spiral design of water discharging tube with UV lamp purifies water thoroughly
- UV lamp is placed in front of the dispensing area to ensure the cleanness of drinking water
- Purify up to 99.9999% of any pathogens

BioCote® Anti-Microbial Protection

- Keep the dispensing area free from bacteria
- Kill up to 80% germs in 15 minutes and over 99% germs in 2 hours of contamination
- Eliminate bacteria such as Staphylococcus aureus, E. coli, Salmonella, Listeriosis, mold and fungus

Product Specifications

Item	Description
Water Options	Cold, Ambient, Hot, Extra Hot
Temperatures	Cold 5-8°C ; Hot 87°C (Extra Hot up to 95°C)
Dimensions	29.6 (W) x 37.5 (H) x 42.5 (D) cm
Dispense Area Height	16.2cm
Weight	18kg
Capacity	Cold tank 1.4L ; Hot tank 1.3L

Our Design

Automatic Purification Monitoring System (APMS)

- Monitors the effectiveness of the UV light
- Alarm will trigger if the lamp be defective, the unit will also stop the supply of water until the faulty lamp has been replaced

Leak Protection Mechanism

- Monitors the internal operation of the dispenser
- Stop the waste of water in the event of a leak

Our Service

Enjoy our service considerate service by monthly rental services:

Free Delivery & Installation

Yearly service with all parts and labour included: filters and UV lamp replacement, sanitization of the internal water dispenser *

Full call out and repair service – next working day

* except any damage caused by misuse
